

Bruce Anderson

If the Midway landfill brownfield is not used for the light rail OMF I would like to see it put to good use as a mobile home park with amenities (small store, community house, etc). You should be able to fit 500 50 ft x 50 ft lots on this brownfield with community buildings. There has been an increasing shortage of mobile home parks and the existing one to the north just got re-zoned. The mobile homes are light and perfect for any brownfield. This landfill has been sealed and the homes would not disturb the seal. A sound barrier should also be installed.
