

Richard C High

Hello,

I would like to ask that we do continue discussion on the Camas Mill clean up and to what extent and zoning. I realize there may be many reasons that are best for all as to the extent of final zoning, but having enjoyed Camas for over 40 years I feel there should be strong consideration for what a visionary clean up and possible public/private partnership could develop in that area. Perhaps even something on the order of the Vancouver waterfront as a true draw for the city core.

At the very least I believe it warrants a public hearing to further the dialogue and talk through the potentials.

Sincerely,

Richard C High
