Connie Groven, P.E.  
Acting Unit Supervisor/Cleanup Project Manager  
Department of Ecology  
Southwest Regional Office/Toxics Cleanup Program  
Olympia WA 98504

The Olympic Environmental Council, a federally recognized non-profit covering environmental issues on the North Olympic Peninsula of WA State, submits the following comment about the western Port Angeles Harbor DARP.

After reading the DARP and joining the NOAA-Klallam Tribe-Ecology webinar, we are pleased that this stage has been reached and have no recommended changes to offer. The presentation was very well done; very clear. We look forward to the next stage — suggested cleanup sites and types of restoration.

Thank you,

Darlene Schanfald
