

Linda Burley

SO MANY CONCERNS STILL TO BE ADDRESSED:

- *Potential future use of the property as a restored estuary reconnecting the Edmonds Marsh to Puget Sound needs to be included in a revised feasibility study.
 - *Public concern has not been properly weighted!
 - *A cleanup plan BETWEEN Alternative 4, complete excavation, and Alternative 6, no excavation, should be considered.
 - *Tribal rights and interests MUST be included in the feasibility study.
 - *UPDATED soil samples are needed before the feasibility study is complete.
- *Chevron Corporation made the mess — they should clean it up.
Please carefully consider the above points, and all concerns of the public. Thank you!
