

Jean Maust

I urge Ecology to revise the Port of Olympia's clean up plan, -1-Amendment to the 2008 Agreed Order-1- to reflect the following:

Dredging should be focused on the hot spots with the highest level of contamination. The Port needs to do more than dredge only the navigational areas in Budd Inlet.

Since continuing surface dioxin contamination in Budd Inlet indicates it is likely from the Cascade Pole dredged material, multiple sampling should be taken using DNAPL protocols established by the Environmental Protection Act.

Thank you.
