

MARY CONDON

I strongly request that Ecology revise the Port of Olympia's clean-up plan, -1-Amendment to the 2008 Agreed Order-1- to reflect the following:

Dredging should be focused on the hot spots with the highest level of contamination. It is not an acceptable clean-up plan for the Port to only dredge the navigational areas in Budd Inlet.

Since continuing surface dioxin contamination in Budd Inlet indicates it is likely from the Cascade Pole dredged material, multiple sampling should be taken using Dense Nonaqueous Phase Liquids (DNAPL) protocols established by the Environmental Protection Act.
