

## BEVERLY BASSETT

I have been hearing about this contaminated site for many many years now and the time has come to do something meaningful about it! I won't go on and on citing documents, but there absolutely is a ton of significant documentation and damning verbal history regarding this cesspool of toxins. Ordinary people like me are quite aware that it is a major and significant problem. Please please, for crying out loud, don't kick this ball down the road one more time again. **DO SOMETHING!!! ACT NOW!!! WE'RE WATCHING AND EXPECTING YOU TO DO THE RIGHT THING!!!**
