

G A

Please stick to timeliness with ESH. The entity has delayed many projects in the past. Many of the buildings at ESH have fallen into disrepair and should be or have been condemned. ESH is good with patients but not construction or environmental cleanup. I live extremely close to ESH and would like to not live next to a burning landfill. If possible, add an independent monitor or agency to assist ESH so leadership takes the issue seriously and remedies it in a timely fashion.
