

Janet Higbee-Robinson

Question: Is current tenant going to be held to high standards to prevent further pollution?

Lay comment: Thanks for Osprey Nesting Plank. Please add more sea bird friendly features. Native tree and bush plantings, grasses, at least in the pocket beaches, and posts off of the beach. Can a kelp garden be planted? Speaking of the pocket beaches, do make them as vibrant as possible. Make the bits of beach natural for forage fish eggs to mature successfully, Consider adding further plantings up on the high ground, in order to provide peace for employees when on break.
