

## Lauren B

Rayonier Mill has left our community with a huge ecological mess. I'm confident that we were all taught at a young age to clean up after ourselves and leave places better than when we first found it. This company has more than enough funds and should be held accountable to this basic life lesson. We saw at our special city hall meeting that the decision from both the council and attendees was unanimous: there is no option beyond option 5. Clean up your mess in its entirety. Do not just throw a rug (dirt) over it, fence it off, and call it good.
