

Kelly Manning

As a concerned resident of Port Angeles I strongly urge the selection of Alternative SL-5 for the cleanup of the former Rayonier Mill site. This option represents a permanent and comprehensive solution that aligns with the City of Port Angeles' Comprehensive Plan and is essential for the future development and economic vitality of our community.

Alternative SL-5 offers a complete and lasting remediation of the site, which is crucial for public health, environmental protection, and future land use. Its implementation will facilitate sustainable growth and provide much-needed opportunities for redevelopment in an area where available sites are scarce.
