

Anna Markee (Anna Markee)

I was born and raised in Tacoma and am well acquainted with the impacts of a pulp mill. In my work creating ecological landscapes, I regularly deal with the challenges of gardening in contaminated soil. Washington state Residents from Port Angeles to Tacoma deserve clean air, water, and soil. I support Alternative 5 so that future generations don't bear the brunt of pollution. As a mother, I urge state leaders to consider the impact to the next seven generations, not just current cost. Additionally, we must take an opportunity to restore natural creeks and shorelines including Ennis Creek.
