

Cherie Kidd

I support the SL5 alternative. It is the ONLY FINAL SOLUTION to the ongoing toxic pollution in the City of Port Angeles on the Rayonier property. To pile up toxic materials into Ten Toxic Acres would be a perpetual problem left to our citizens. We have to restore Ennis Creek and make the property available for mixed-use development in the future.

Option SL3 is NOT a SOLUTION for our city. It is only continuing the off-putting of a final cleanup that our city has endured for the last 28 years. That property is prime property for economic development that has been lost to our community. Final Clean up - please remove all toxic soil SL5.
