

Jessica Straits

I'm writing to express my strong support for cleanup alternative SL-5. It's so important that we prioritize the long-term physical and mental health of the people in our community. Protecting our environment is just as important, both for its health and for creating safe opportunities for our community and local economy to grow and thrive. SL-3 does not provide lasting environmental protection and could leave behind risks that make it harder for our area to recover. SL-5 is the only option that ensures a permanent cleanup and truly reflects a commitment to our community's future.
