

Samuel Woods

ITT operated their mill causing pollution in Port Angeles harbor at a profit for many years. They shut down this Mill and have spent the time since using various techniques to avoid cleaning up their mess. They even hired some Port Angeles good old boys at Harbor Works drag it it out and waste time, 20 years. It is time for ITT for clean up snd clean up now. I hope they do not bribe or bs your agency into more delay, they will undoubtedly try as there is a pattern of it with this company. They will try and "get to" someone, beware.KVT9
