Thank you so much, Augie!

Sincerely,
Yaya

Hi Yaya,

We see no issue with extending the comment period another 15 days through **July 15th**. Thank you for reaching out and let us know if there is anything else we can do to assist with your document review!

Best,

Augie Nuszer

Hi Meredith,

DRCC would like to request a two-week extension for the Glacier Northwest, Inc. site study to most thoughtfully respond to the remedial investigation. Please let us know if this is possible!

Sincerely,

Yaya

Good morning,

Starting today, Monday, June 1 – June 30, 2026, the Department of Ecology will hold public

comment periods on the following Lower Duwamish Waterway cleanup sites:

- **[Glacier Northwest, Inc.](#)**: A site study (called a remedial investigation) will be available for review and comment.
 - **Location** : [5900 W Marginal Way SW](#) on banks of the Lower Duwamish Waterway in the Lower Reach.
 - **Background** : Contamination at the site is the result of historical uses and practices including manufacture of pentachlorophenol, glues and resins. Since the 1960s, the property has primarily been used as a cement storage and distribution terminal under various property owners and operators, and the southern portion of the property has been intermittently leased for equipment storage to other entities. The property has been owned by Glacier Northwest, Inc. since 1991.
 - **Site Manager**: [Cliff Nale](#), (425) 725-0438

- **[Precision Engineering Inc.](#)**: A site study (called a [remedial investigation](#)) and [options for cleanup \(called a feasibility study\)](#) will be available for review and comment.
 - **Location** : [1231 South Director Street](#) in the Upper Reach of the Lower Duwamish Waterway.
 - **Background** : From 1968 to 2005, Precision Engineering, Inc. operated a metal-finishing shop on the property, performing hard-chrome plating, grinding, welding, and hydraulic cylinder work. Over the decades, leaks and spills from the plating tanks and solvent storage areas released chromium, trichloroethylene (TCE), and petroleum into the soil and groundwater beneath the building.
 - **Site Manager** : [Arthur Buchan](#), (360) 628-4415

You can learn more about each site and read the documents available for public comment by visiting each webpage (linked above).
