

## Barbara Hedges

Please add Lake Vancouver to your priority list for water quality improvement as soon as possible. Lake Vancouver is a beautiful asset to our community, providing much needed protection for wildlife and a much needed water resource for swimming, boating and attracting serious community recreation. Having the Lake closed down often during warm summers (which are seemingly on an upward trend of getting warmer each year) because of bacteria presence is denying citizens of a much needed reprieve from the heat, and endangering the wildlife dependent upon the lake.

Your help is needed.

Thank you.
