

Scott Judkins

Please make Vancouver Lake's health a priority. It's a valuable asset to everything around it. People enjoy its attributes for many types of recreational activities. The natural world depends on it for life and sustenance. I regularly see bald eagles, golden eagles, hawks, many kinds of migrating birds, and deer in, above, and around the lake. They depend on a healthy Vancouver Lake more than anybody. Please help us protect and grow Vancouver Lake's sustainability. - Scott Judkins
