

## Jennifer More

As a citizen of Vancouver, and an avid outdoor enthusiast, I feel it's imperative that the state make caring for the safety and sustainability of Vancouver Lake a priority. We have an ecosystem to maintain in this beautiful body of water. It is used by families, groups, and teams, including dragon boats with breast cancer survivors (of which I am). My husband and I live in NW Vancouver and can see the lake from our home. Its preservation brings calmness and a sense of community and state commitment to our region. Please put it on the top of your list!! Jennifer More
