

Serin Hale

Please help clean up Vancouver Lake! It's a lovely body of water, close to the community, that we could use so much more if it were safe and clean. The wildlife around it is stunning - I'm lucky enough to live near it, so I get to enjoy the bald eagles catching fish, and hear the coyotes singing across the water. If it were safe and clean, the wildlife and the community involvement with it would flourish. I'd love to see this beautiful part of Washington state given the help it needs.
