

Ioannis Chrissopoulos

Vancouver Lake's condition is deteriorating. Pollutants from nearby industry and changes in the flow between the lake and the Columbia river have brought toxic algae blooms and allowed the proliferation of the invasive Eurasian milfoil.

We do enjoy the lake and the opportunities it brings in the adjacent park. We have two kids that practice in the lake at least three times per week.

Please help us clean it up and keep it safe.

Thank you,

Yiannis Chrissopoulos
