Re: Vancouver Lake, WA

This wonderful lake is needing help!

It could be a terrific asset for the community, as a local water/nature draw. It could host water athletic events that would provide an economic boost. It has a varied group of supporters who are working hard to develop walking trails, water athletic groups, and natural wildlife areas. Some of the issues are bigger than we can solve ourselves, so we ask the Dept of Ecology to prioritize this gem and help with clean-up. Strong community support would make sure that work on Vancouver Lake is worthwhile.
