Table 7: Effluent Characterization � Final Wastewater Effluent
Reference calculation "C" below the table indicates flow as "CFS" for the TIN calculation. It appears this flow unit should be in the units of "mgd" to make this formula work properly.

Table 4: Wastewater Effluent Characterization
The "Ammonia" and "Nitrate/Nitrite" parameter does not specify the value as nitrogen or show the method. Could you please clarify if this value is reported as "N".

Thank you,
