

# **Bob Vadas, Jr.**

Given the state of net-pen disrepair in the North Sound that led to the massive escape of Atlantic salmon, as well as the downplaying & deals that Cooke Aquaculture tried to pull on the subject, they've worn out their welcome in WA. That's why the state legislative banned the practice for our state citizens. We need to be promoting native salmon, not 'technofixes' that translate to further eutrophication of Puget Sound.
