

# **Waters West Fly Fishing Outfitters**

Stop the madness! Cooke has clearly shown that they either don't care at all about environmental impacts or are just extremely incompetent.

Remember how they blamed the 2017 net pen failure on the eclipse tides? They clearly have no problem with lying or making up facts.

Stop spending tax money trying to give this company more chances to destroy our fisheries, and spend it on restoring our wild fish runs which are part of our rich Northwest tradition.
