

# **Martin McCallum**

I have resided in Washington state for over 60 years. I object to any net pen aquaculture in the Puget Sound (other than Tribal salmon fry pen rearing and release) and I strongly object to having the Washington State Department of Ecology authorize "any" expansion or extension of Cooke Aquaculture net pen operations in the United States. I do support DOE, Washington State Fish & Wildlife, and Tribal rules and regulations that protect our native wild steelhead. Thank you. Martin McCallum
