

# StaffReady

As the CEO of StaffReady, I care deeply about the river running through the city where we headquarter our company. I'm in opposition to any rollbacks or variance allowances that would increase in anyway pollution load on our river.

I want our region to continue to be fostered and fed by a healthy river, a river of life, not a river designed to carry away toxic waste.

We have made great strides as a country in moving to protect and manage our natural resources as opposed to short-term loopholes focused on quick profit.

Thank you for your consideration,  
Nancy Janzen
