

Tom Sahlberg

Re: This, from the Spokane Riverkeeper Jerry White in the 7/22 Spokesman Review - "If successful, the variance effectively asks us to wait for another generation for the promise of clean water and edible fish to come true." PLEASE DO NOT SEEK, SUPPORT or ALLOW this variance!!! As a 7 decades resident of Spokane County, I remember when the Spokane River was poison, AND how in the 70s-80s we became a model for cleaning up our River. DO NOT LET THIS HAPPEN AGAIN !!! PCBs are POISON ... and we're still not removing the heavy metal contaminations from upstream, even after designated the "Kellogg Superfund Site". I am not for unnecessary regulations, however in this case I believe it is critical to insist on enforcing the "Clean Water Act" promise ... Thank you ... Tom Sahlberg
