

## Duffy MCKENZIE

NO! NO! NO! Your industry has already proven itself incapable of securely containing your disease ridden faux food. Your industry is single handedly the greatest detriment to our wild salmon populations. Your permits should be revoked outright! The Atlantic salmon you currently raise have been proven unable to survive and reproduce in the wild here. I DO NOT TRUST YOU WILL ONLY HAVE STERILE FEMALE STEELHEAD! Viable fish and males will certainly slip thru the cracks into the tanks. Posing yet another threat to our wild fish populations. Your use of antibiotics in your cesspools of filth, riddled with sea lice and abhorrent living conditions are appalling and ought be illegal. Your abuse and pollution of our waters should be illegal! Take your industry on to land and quit destroying our natural habitat!

Anyone who is interested, please watch the documentary Salmon Confidential. It is free on YouTube.
