

Allan Holmes

The problem here is that for at least the last 30 YEARS we've been living here Cooke Aquaculture has promised and promised, but seldom, if ever, performed. It's time to end the charade. They've never been good neighbors for the 33 years we've lived here so there's no reason to believe they will change their mushroom theory business plan which amounts to "keep 'em in the dark and feed 'em a bunch of shit". Excuse my language, but enough is enough and we feel powerless. PLEASE shut down this operation asap and let them return to Canada with their business venture and leave us alone. Thank you.... Allan Holmes
