

Ed Boehmer

I totally agree that we have "kicked the can down the road too long". It is time for the public and the local jurisdictions to pursue financing on both local, national and state levels. New developments and construction to improve the tax base and revenues can be diverted to this more immense problem that affects the quality of life in the NW and makes people want to move here!!! I think if Olympia can begin in 1984 these other counties have been ignoring the problem and now must step up. Take out bonds, have our senior Senators go after some of this infrastructure money that is being talked about. A little proactive approach helps rather than reactive which seems to be the norm!
