

## DK Weamer

Stop supporting old and outdated technologies and ban scrubbers from the Puget Sound. Please protect endangered orcas from fossil fuel waste. Orcas are a very important species in the Sound and in the ocean, without orcas do we even know how our sea ecology would be impacted. For every species that disappear from this world, Humans become more and more vulnerable to extinction as well. Protect yourself and the world for your children and grandchildren. Protect Orcases and protect Puget Sound!
