

## Richard Thoma

Ban scrubbers is only a first small step in the right direction. However it is not enough. Not only cruise ships pollute but also cargo ships. The biggest 20 cargo ships pollute more than 50 million cars. The same applies to cruise ships and they pollute even when they don't cruise sitting idle at quay.

The action should be to transform these polluters and run on hydrogen. That would be a great step to curb pollution and reduce carbon dioxide emissions
