

Karla Hart

Cruises to Alaska are tightly linked with Puget Sound. I support all efforts to reduce the environmental footprint of the cruise industry. Pollution discharged into Puget Sound waters impacts the entire ocean, as does pollution discharged into Alaska waters. Together we must call for the highest standards. Laws are better but an MOU is a start.

I support a ban on the discharge of exhaust gas scrubber washwater from all scrubber types in all waters, including the MOU waters.

I support a Vessel Sewage No Discharge Zone (NDZ) for Puget Sound to reflect the Washington state NDZ regulation.
