

Donald Walsh

If cruise industry cannot operate in a responsible non polluting manner they should close They teach you in kindergarten to clean up after yourself About time cruise industry graduated from kindergarten As first step Ban Scrubbers. I support amendment 2 to ban scrubbers.

This is also an opportunity for the cruise industry to change their dirty ways by stopping dumping of all scrubber wastes in Puget Sound and the marine life ecosystem there Also use less polluting fuel and/or energy sources. Approve amendment 2 and ban scrubbers.

The COVID-19 pandemic has been a welcome reprieve from the water pollution these ships create. Scrubber dumping cannot return I support amendment 2.I certainly will not patronize this dirty industry in present polluting form
