

Nancy DeNazario

I did not know that cruise ships contributed to pollution in the water through "scrubbers". That certainly is not in the literature of how great it is to take cruises, and it is time for this to be addressed every bit as much as climate change issues. That the loophole exists for the cruise industry to get away with this is reprehensible and were it deemed illegal, I'm sure the cruise industry would find a way to do a better job. Because I lived in that area, I have particular sadness to hear of its abuse.
