I support amendment #2! Humans have impacted every single species on earth with our wasteful, polluting, selfish, greedy ways. Banning scrubbers-which 'scrub' cruise ship exhaust and discharge the toxic wastewater directly into the ocean-would be a step in the right direction to heal the planet. There has been a cessation of cruise traffic in Puget Sound since the covid-19 pandemic and therefore, a much needed reprieve from the water pollution from these ships. Scrubber dumping cannot return to the Sound.
