

## Laura Robinson

I am writing in support of Amendment 2, to ban scrubbers on cruise ships in Puget Sound. The wastewater that is discharged into our waterways is heavily laden with toxins that are bad for our environment, specifically our marine mammals, which have so many environmental pressures imperiling their survival. I am very skeptical of the cruise industry's environmental record and I do not believe allowing them to pollute will improve their public image. It is in their own self-interest to not be allowed to harm the environments of areas they visit. The welfare of WA residents and the ecosystem we are a part of should be paramount. Please create a sustainable path forward.
