

Bonnie Powers

I support amendment#2.

When the Marine animals are killed and no longer live in the waters of the earth due in part to scrubbing, how will the cruise lines defend their complicity in their deaths? We are caretakers of our marine family and all animals living on our earthly home. We are accountable to God for our actions. When the waters around the earth are so filthy, no one will want to take cruises! People will not take vacations on cesspools! Is greed your guide?
