

JOAN Mimnaugh

This is a truly awesome opportunity to help the planet! Not everyone has the chance to enact rules that truly make a difference. But you do now! Please exercise this decision with so much thought and care!

PLEASE ban scrubber waste discharge into Puget Sound. This toxic waste is a terrible hazard for Orcas and the entire marine ecosystem.

We need to take serious action NOW to protect our environment from these types of dangerous actions - because very soon we may not be able to fix this. But we can now!
