

Ivan Fuentes

I support the environment and wildlife so when I heard about this critical situation, I knew I had to say my piece. Finding a solution for humans should never come at the expense of animals or the planet. It's inhumane and just cruel to continue using these scrubbers. All types of animals are suffering around the world because people are not caring and it is disgusting as it is wrong. Please do the right and just thing by ending the usage of scrubbers.
