

Kate H

It's 2021 already, for heaven's sake. There are ways to handle waste that do not endanger our oceans, climate, the rest of the environment because oceans touch everything...

Cruise ships are a complete frivolity and absolutely no amount of pollution should be allowed or is acceptable from such activities. If the complaint is cost, tough! Cruise ships should pass the cost of eco-friendly practices on to their passengers, as they do with everything else. NO MORE dumping of ANYTHING from a cruise ship (or any other ship)!!! Stop it NOW!!!
