

Lee Schondorf

I support amendment #2 to ban scrubbers. No person would allow this, only filthy corporations and politicians would allow the chemical waste to be discharged into the water. And I imagine it's worse than we're being told because we personally took a cruise ship to the Inner Passage and saw 3-4am the operations crew dumping the ship's garbage into the ocean in gigantic Hefty type plastic bags.

Also, Politician Corporate Shills must be imprisoned for life.
