

Sarah Stewart

Scrubbers convert air pollution into water pollution and dump this fossil fuel combustion wastewater straight into the ocean. In high traffic inlets like Puget Sound, the build up of scrubber dumping is compounding and has serious implications on endangered species like killer whales. We support Amendment #2 to ban scrubbers.

The current situation has a big loophole which is allowing the toxicity of scrubbing to be allowed. This is an opportunity for the cruise sector to show that they are committed to changing their polluting ways by agreeing to end the dumping of all scrubber wastes in Puget Sound. Please approve amendment #2 and ban scrubbers.
