

David Mayer

I do not support the amount of pollution cruise ships and other large ocean-going vessels are allowed to dump in our waterways. I especially do not support additional concentrated carbon-based pollutants being added to that mix. This is one reason why I do support Amendment #2. I have read that our Sound's marine life have benefited from reduced traffic due to Covid. I want that trend to continue. I have also heard that cruise lines want to paint a more positive image with regard to pollution. For all of these reasons, I support Amendment #2.
