

Joan Knipe

Our marine ecosystem has so many things attacking it. The scrubbers are just one more thing that helps to kill off marine life. The ecosystem needs a healthy home to survive. The COVID-19 pandemic has been an ongoing tragedy on a global scale, but the resulting cessation of cruise vessel traffic in the Puget Sound has been a welcome reprieve from the water pollution these ships create. That's why scrubber dumping cannot return to the Sound. I support amendment #2.
