

# City of Issaquah

Page 8, Groundwater and Other Critical Areas, In the last paragraph, "See Section 3" is a different font and linked to another section but not highlighted blue, as is typical for links.

Page 16, Susceptibility factors, 8th bullet in this list doesn't give a definition of a factor, it's an example that doesn't seem to fit this section or merge with prior bullet on gradient?

Page 78, "Section 11 – Implementation – Authority, Monitoring, and Program Integration", Local groundwater monitoring programs, Remove "A" from the first paragraph.

In the time between working with Ecology on Appendix A and the comment period, the City of Issaquah has worked to incorporate more of our Community Planning and Development Department into the CARA processes and protection efforts. A track-changes word file proposing how Appendix A could be updated to reflect the most current processes will be emailed directly to Laurie Morgan. Please feel free to reach out (contact Julie Wartes) to discuss any comments or questions regarding this, as well.
