

## Eric Burr

Beavers are our best recharge resource, and they need all the help -financial and otherwise, that is politically possible. Agricultural water use is second, and private homes third. The U.S. Forest Service and DNR could use the most help with Beavers. Methow Conservancy lands are increasingly influential with agriculture. Sam Lucy's Bluebird Grains has the most experience. [Americanalps.org](http://Americanalps.org) for the high country.
