To: ECY RE WQ CAFO PERMIT
Subject: resident feedback on Ecology CAFO proposal

Dear Chelsie.

Please prepare an indepth revision to this ridicules, poorly written, Ecology's State Waste Discharge General Permit Program rule WAC 173-226-120 (and one more I think) it has to clearly allow people to raise animals on their home farms simply and freely !

The legislator did enough moves to make the life of home owners, property owners and residents- (especially in rural area), miserable with gopher, water rights, water front rules and more...

Please let rural residents enjoy our rural life...

Thanks!
sorry for any typos
