

## Silent Majority Foundation

I'm writing to express concern resulting from the lack of clarity on the regulation of small CAFOs. Specifically, I did not see where Ecology clearly defined "significant contributor." Without a clear definition of the term, it appears that Ecology has unilateral authority to declare any small CAFO (which has no low threshold limits as each animal is designated as "less than" a certain number of animals). Without a definition of "significant contributor," there is a high likelihood that the Permit will be enforced in an arbitrary and capricious manner.
